Foreword

ISO (the International Organization for Standardization) and IEC (the International system for worldwide standardization. National bodies that are members of ISO Standards through technical committees established by the respective organ and IEC technical committees collaborate in fields of mutual interest. Other international governmental, in liaison with ISO and IEC, also take part in the work. In the field established a joint technical committee, ISO/IEC JTC 1.

International Standards are drafted in accordance with the rules given in the

The main task of the joint technical committee is to prepare International Standards. The technical committee are circulated to national bodies for voting. Publication of a Standard requires the approval of 75 % of the national bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may not be held responsible for identifying any or all such patent rights.

ISO/IEC 29147 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Security techniques*.
